Overview

Instagram Feed is an effective extension to integrate Instagram images to Magento 2 stores. This trendy module allows placing eye-catching Instagram photos block to any pages, which will draw customer retention and bring a modern look to online stores.

Main Features

- Enabled Instagram photos anywhere.
- Add Instagram title, icon and url.
- Set no images for display feed.
- Enable Caption on Hover.
- Can add Custom CSS.

Account & Pricing

You have to create an Instagram account or log in to an existing one to use the extension. Instagram API may require additional charges as described in the guidelines. It is necessary to obtain and enter an Instagram API key. Please, go to the Authentication Page to learn how to get it. Currently, there are no additional fees for the service.

Installation Guide

Once you have purchased & downloaded our extension follow the below steps to install the extension. The easiest way to install a Magento 2 extension is by using SFTP or FTP. To do this, first, download our Advanced Contact Form module and follow the below steps.

In short, for Professionals or Techie Person

1. Unzip the extension.
2. Login to your root directory via FTP or SFTP.
3. Go to your remote directory app/code/

4. Create directory Zestardtech and under that create a subdirectory **Instagramfeed**.
5. Now upload all the unzipped code into the **Instagramfeed** directory.
6. Then open your SSH or Terminal.
7. Go to your root directory and RUN below 5 commands step by step:
    - php -f bin/magento module:enable Zestardtech_Instagramfeed --clear-static-content
    - php bin/magento setup:upgrade
    - php bin/magento setup:di:compile
    - php bin/magento setup:static-content:deploy -f
    - php bin/magento cache:clean
8. If you didn't get any error during the commands execution process then our extension is successfully installed in your store.

Detailed Installation Instructions

Step 1: Connect to FTP and upload the unzip directory.

- Connect to your site using FTP or SFTP. Go to your remote directory app/code/
- Create directory Zestardtech and under that create a subdirectory Instagramfeed. Now upload all the unzipped code into this directory.

Step 2: Run Commands

- Open your SSH or Terminal.
- Go to your root directory and RUN below 5 commands step by step:
    - php -f bin/magento module:enable Zestardtech_Instagramfeed --clear-static-content

- php bin/magento setup:upgrade
- php bin/magento setup:di:compile
- php bin/magento setup:static-content:deploy -f
- php bin/magento cache:clean

- If you didn't get any error during the commands execution process then our extension is successfully installed in your store.

Step 3: To confirm Installation and activation.

- To complete the installation you need to log out of your Magento Admin and login back.
- Open your SSH or Terminal and run this command **php bin/magento module:status Zestardtech_Instagramfeed** and if you get Output as **Module is enabled** then our extension is installed properly in your store.

To Note: If you face any error during this process then please either share the screenshots or share credentials of your store at our email id **support@zestard.com** and will help you install the extension properly.

User Guide

How to call in CMS Page?

```
{{block class="Zestardtech\Instagramfeed\Block\Instagramfeed"
template="Zestardtech_Instagramfeed::Instagramfeed.phtml"}}
```
