## Overview

Mobile phones have relieved our lives to an extent and it is something you would like to browse, buy, watch or do in simply a click. With the rising use of mobile phones, users demand E-commerce to provide a service that is available anywhere at any time. Due to increasing cases for spammers and security break day by day results in poor customer experience and effects to the relations with your customers. Zestard's Magento 2 Login Via Mobile Number lets the customer register and login using the mobile number at the E-commerce site for quick access.

With the help of this extension, the store owners can give options to their customers to signup via mobile or email which gives them basic choice to create their account via mobile phone.

Unfortunately, Magento 2 allows the store owners to make their customers register via email but not with the mobile number. This extension eases the procedure of registration or login for customers.

For Eg: For the E-Commerce stores it is necessary to have an option which allows their customer to login via email as well as mobile number. In order to ease that for we came up with Login Via Mobile Number for Magento 2 which gives you the ability to allow your customers to register or login by entering the mobile number.

## Main Features

### Admin Oriented

- Admin can easily enable/disable the mobile number login feature from the backend.
- Ability to set the mobile number as a required or optional field.
- Allows setting the MIN & MAX number for the mobile number validation.
- Admin can also update/modify any customer's mobile number from the customer section.

### Customer Oriented

- Customers can easily login and register their accounts by entering their mobile number.
- Customers can even login to their accounts using their email or mobile number at checkout.
- If the customer wants to change their mobile number they can edit My Account section.
- Customer can't register or update mobile number which is already registered with the store.

### Reasons to choose Zestard's Login via mobile number?

<b>Easily enable/disable the module</b>	<b>Flexible settings</b>	<b>Ability to set mobile number as required or optional field</b>
<b>Set Min &amp; Max number for validation</b>	<b>Customers can choose to login via email or mobile</b>	<b>Great Support</b>

## Installation Guide

Once you have purchased & downloaded our extension follow the below steps to install the extension. The easiest way to install a Magento 2 extension is using SFTP or FTP. To do this, first, download our Login via Mobile Number module and follow the below steps.

### In short, for Professionals or Techie Person

1. Unzip the extension.
2. Login to your root directory via FTP or SFTP.
3. Go to your remote directory app/code/
4. Create directory Zestardtech and under that create subdirectory Mobilelogin.
5. Now upload all the unzipped code into Mobilelogin directory.
6. Then open your SSH or Terminal.
7. Go to your root directory and RUN below 4 commands step by step:
  - php bin/magento setup:upgrade
  - php bin/magento setup:di:compile
  - php bin/magento setup:static-content:deploy -f
  - php bin/magento cache:clean
8. If you didn't get any error during the commands execution process then our extension is successfully installed in your store.

**To Note:** If you face any error during this process then please either share the screenshots or share credentials of your store at our email id **support@zestard.com** and will help you install the extension properly.

## Detailed Installation Instructions

### Step 1: Connect to FTP and upload the unzip directory.

- Connect to your site using FTP or SFTP. Go to your remote directory app/code/
- Create directory Zestardtech and under that create subdirectory Mobilelogin. Now upload all the unzipped code into this directory.

### Step 2: Run Commands

- Open your SSH or Terminal.
- Go to your root directory and RUN below 4 commands step by step:
  - php bin/magento setup:upgrade

```
[root@103 magento221]# php bin/magento setup:upgrade
Cache cleared successfully
File system cleanup:
/home/idoideo/public_html/magento221/generated/code/Composer
/home/idoideo/public_html/magento221/generated/code/Magento
/home/idoideo/public_html/magento221/generated/code/Shopial
/home/idoideo/public_html/magento221/generated/code/Syafony
/home/idoideo/public_html/magento221/generated/code/Zestardtech
/home/idoideo/public_html/magento221/generated/metaddata/adminhtml.php
/home/idoideo/public_html/magento221/generated/metaddata/crontab.php
/home/idoideo/public_html/magento221/generated/metaddata/frontend.php
/home/idoideo/public_html/magento221/generated/metaddata/global.php
/home/idoideo/public_html/magento221/generated/metaddata/webapi_rest.php
/home/idoideo/public_html/magento221/generated/metaddata/webapi_soap.php
/home/idoideo/public_html/magento221/pub/static/adminhtml
/home/idoideo/public_html/magento221/pub/static/deployed_version.txt
/home/idoideo/public_html/magento221/pub/static/frontend
/home/idoideo/public_html/magento221/var/view_preprocessed/pub
```

- php bin/magento setup:di:compile

```
[root@103 magento212]# php bin/magento setup:di:compile
Compilation was started.
```

- php bin/magento setup:static-content:deploy -f

```
[root@103 magento221]# php bin/magento setup:static-content:deploy -f
Deploy using quick strategy
Frontend/Magento/blank/en_US 500/2088 =====>----- 23% % 3 secs
█
```

- php bin/magento cache:clean

```
[root@103 magento221]# php bin/magento cache:clean
Cleaned cache types:
config
layout
block_html
collections
reflection
db_ddl
eav
customer_notification
full_page
config_integration
config_integration_api
translate
config_webservice
```

- If you didn't get any error during the commands execution process then our extension is successfully installed in your store.

### Step 3: To confirm Installation and activation.

- To complete the installation you need to log out of your Magento Admin and login back.
- Open your SSH or Terminal and run this command **php bin/magento module:status Zestardtech\_Mobilelogin** and if you get Output as **Module is enabled** then our extension is installed properly in your store.

**To Note:** If you face any error during this process then please either share the screenshots or share credentials of your store at our email id **support@zestard.com** and will help you install the extension properly.

## User Guide

Customer Login Via Mobile Number

2. Once the admin enables the extension then the Mobile Number field is visible on the customer registration page.

The screenshot shows the LUMA website's customer registration page. The page title is "Create New Customer Account". The form is divided into sections: "Personal Information", "Sign-in Information", and "Additional Information". The "Mobile Number" field in the "Additional Information" section is highlighted with a red dashed border. A red text annotation reads: "Once the admin enables the extension then the Mobile Number field is visible on the customer registration page." The page also features a search bar, navigation menu, and shopping cart icons.

3. At the time of login Customers can login via mobile number or email.

The screenshot shows the LUMA website's customer login interface. At the top left is the LUMA logo. To its right is a search bar with the placeholder text "Search entire store here...". Further right are icons for a shopping cart with a "0" and a shopping bag. Below these is a navigation menu with items: "What's New", "Women", "Men", "Gear", "Training", and "Sale". The main heading is "Customer Login".

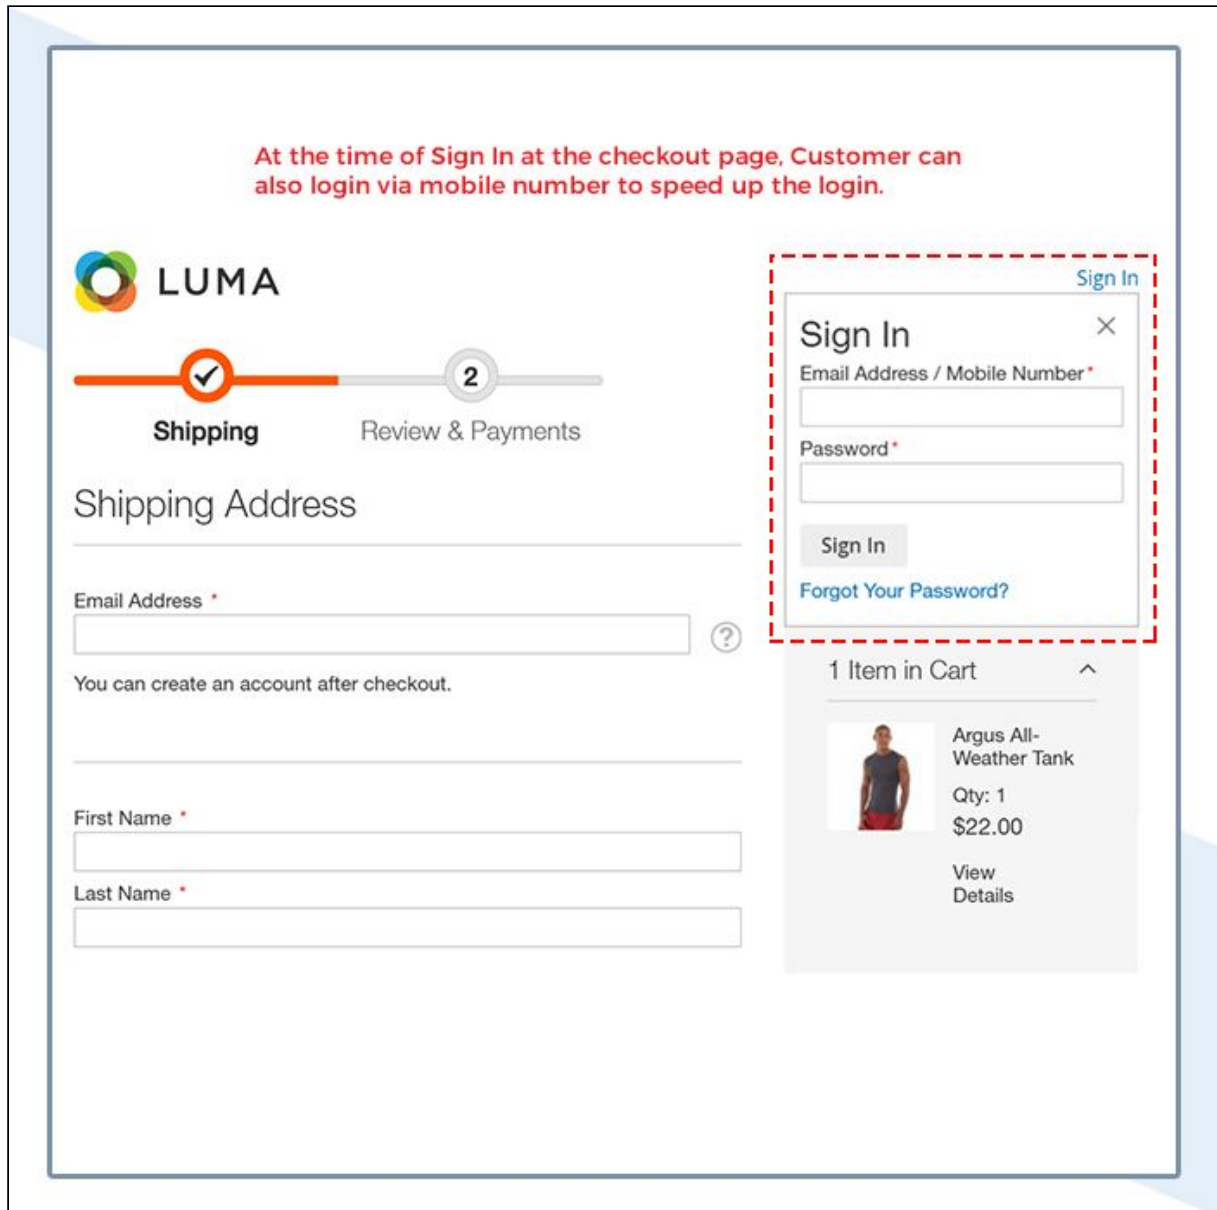

There are two columns of content:

- Registered Customers:** A sub-heading followed by the text "If you have an account, sign in with your email address." Below this is a red dashed box highlighting the "Login with Email / Mobile Number" label and the input field. Below the input field is the "Password" label and another input field. At the bottom of this section are a blue "Sign In" button and a link "Forgot Your Password?".
- New Customers:** A sub-heading followed by the text "Creating an account has many benefits: check out faster, keep more than one address, track orders and more." Below this is a blue "Create an Account" button.

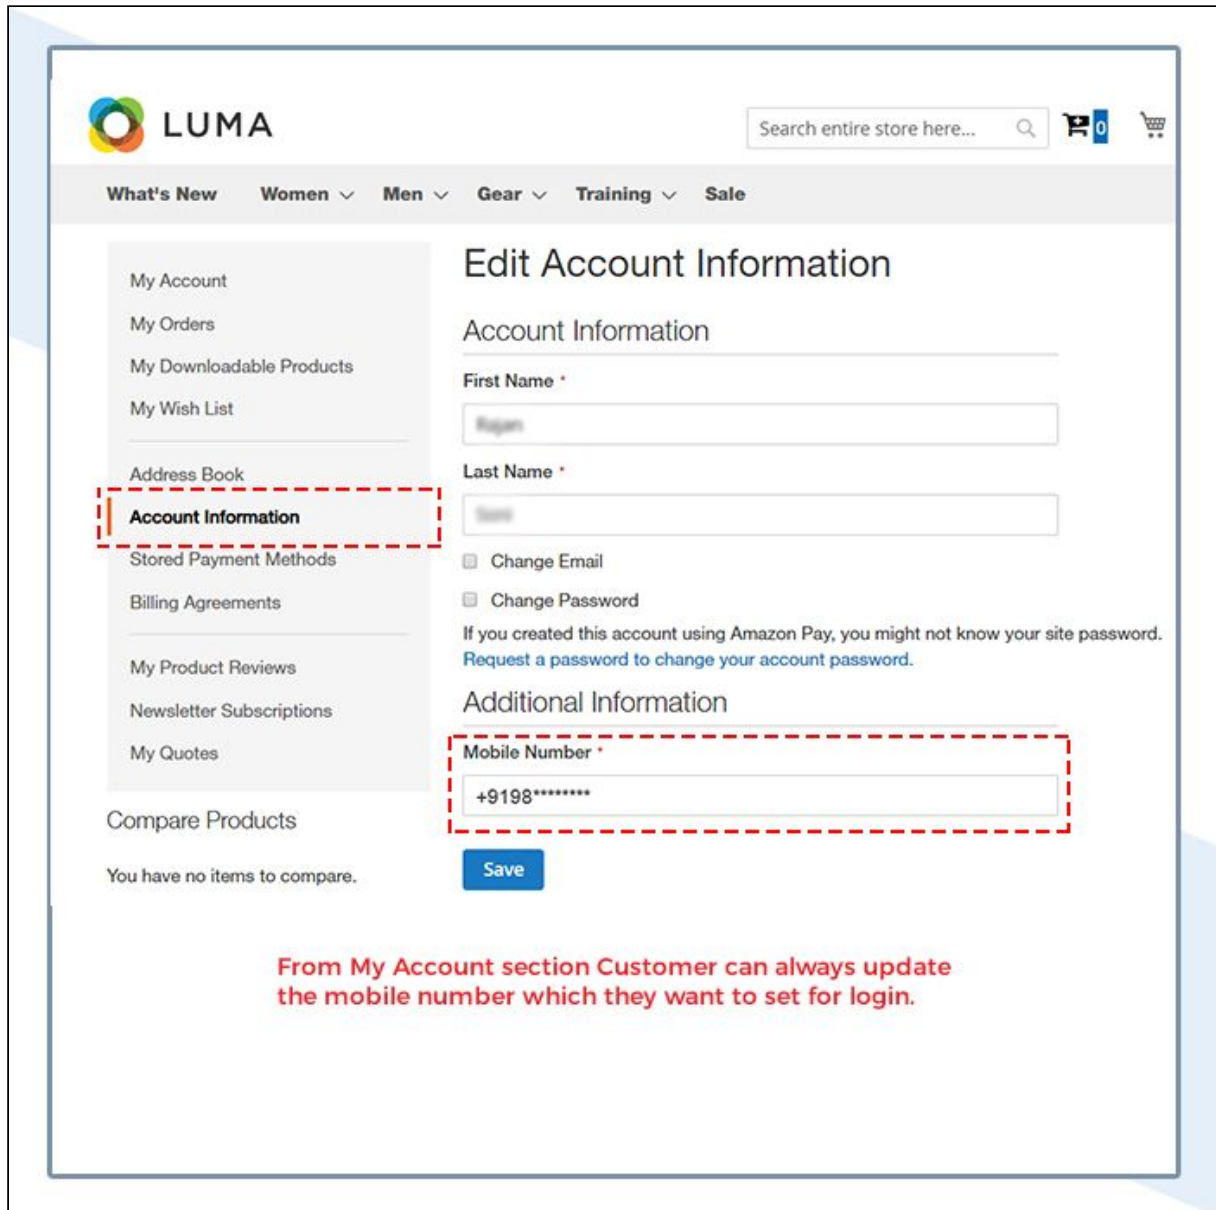

At the bottom left, there is a red asterisk "\* Required Fields". At the bottom center, there is a yellow box with a warning icon and the text "Try Demo Customer Access", "Email: roni\_cost@example.com", and "Password: roni\_cost3@example.com".

At the time of login Customers can login via mobile number or email.

4. At the time of Sign in at the checkout page, Customer can also login via mobile number to speed up the login.

- From My Account section Customer can always update the mobile number which they want to set for login.

**Note:** If admin disables the module from the system configuration then the customer not able to login via a mobile number from login and checkout page and the customer can't able to add mobile number while registration.
