Overview

Zestard's ultimate "Per Product Flat Rate" extension can be used to assign different flat rates to each product depending on the product if it is to be shipped based on location. This extension is used to set different shipping rates for each product from the admin product edit section.

Admin can apply different flat rates for different products. These rates will be added from the product edit page so it's very simple to assign different flat rates from admin without any headache.

Main Features

- Can apply individual shipping rates for each product.
- Shipping rates can vary depending on the location of shipping.
- Can assign Global rates for selected products so you don't have to edit each product which can save a lot of time.
- Has an option to display shipping rates on the product view page.
- Has an option to apply the shipping rate to each product quantity if the quantity of the same product is more than 1.
- Easy to use.
- Enable/disable from the backend.
- If you want to show the shipping charges on the product view page you can enable the Show Shipping Prices by setting it as "Yes".
- If required, custom CSS can be applied from the custom CSS box.

Reasons to choose Zestard's Per Product Flat Rate?

Easy to use.	Can apply individual shipping rates for each product.	Can assign Global rates for selected products.
Display shipping rates on the product view page.	Shipping rates can vary depending on the location of shipping.	Flexible settings.

Installation Guide

Once you have purchased & downloaded our extension follow the below steps to install the extension. The easiest way to install a Magento 2 extension is by using SFTP or FTP. To do this first, download our Customflatrate module and follow the below steps.

In short, for Professionals or Techie Person

1. Unzip the extension.
2. Login to your root directory via FTP or SFTP.
3. Go to the below path in your remote directory app/code/
4. Create directory Zestardtech and under that create subdirectory **Customflatrate**.
5. Now upload all the unzipped code into the **Customflatrate** directory.
6. Then open your SSH or Terminal.
7. Go to your root directory and RUN below 4 commands step by steps:
 - php bin/magento setup:upgrade
 - php bin/magento setup:di:compile
 - php bin/magento setup:static-content:deploy -f
 - php bin/magento cache:clean

8. If you didn't get any error during the commands execution process then our extension is successfully installed in your store.

To Note: If you face any error during this process then please either share the screenshots or share credentials of your store at our email id support@zestard.com and will help you install the extension properly.

Detailed Installation Instructions

Step 1: Connect to FTP and upload the unzipped extension directory.

- Connect to your site using FTP or SFTP. Go to the remote directory /app/code.
- Create directory **Zestardtech** and under that create subdirectory **Customflatrate** and upload the unzipped code into this directory.

Step 2: Run Commands

- Open your SSH or Terminal.
- Go to your root directory and RUN below 4 commands step by steps:
 - php bin/magento setup:upgrade

```
[root@server magento232]# php bin/magento setup:upgrade
Cache cleared successfully
File system cleanup:
/home/idroides/public_html/magento232/generated/code/Composer
/home/idroides/public_html/magento232/generated/code/BSP
/home/idroides/public_html/magento232/generated/code/Magento
/home/idroides/public_html/magento232/generated/code/Symfony
/home/idroides/public_html/magento232/generated/code/Zestardtech
The directory '/home/idroides/public_html/magento232/generated/metadata/' doesn't exist
```

- php bin/magento setup:di:compile

```
[root@server magento232]# php bin/magento setup:di:compile
Compilation was started.
```

- php bin/magento setup:static-content:deploy -f

```
[root@server magento232]# php bin/magento setup:static-content:deploy -f
Deploy using quick strategy
frontend/Magento/blank/en_US          2302/2302  ===== 100% % 5 secs
adminhtml/Magento/backend/en_US      2353/2353  ===== 100% % 5 secs
frontend/Magento/luma/en_US          2318/2318  ===== 100% % 6 secs
```

- php bin/magento cache:clean

```
[root@server magento232]# php bin/magento cache:clean
Cleaned cache types:
config
layout
block_html
collections
reflection
db_ddl
compiled_config
eav
customer_notification
config_integration
config_integration_api
full_page
config_webservice
translate
vertex
```

- If you didn't get any error during the commands execution process then our extension is successfully installed in your store.

Step 3: To confirm Installation and activation.

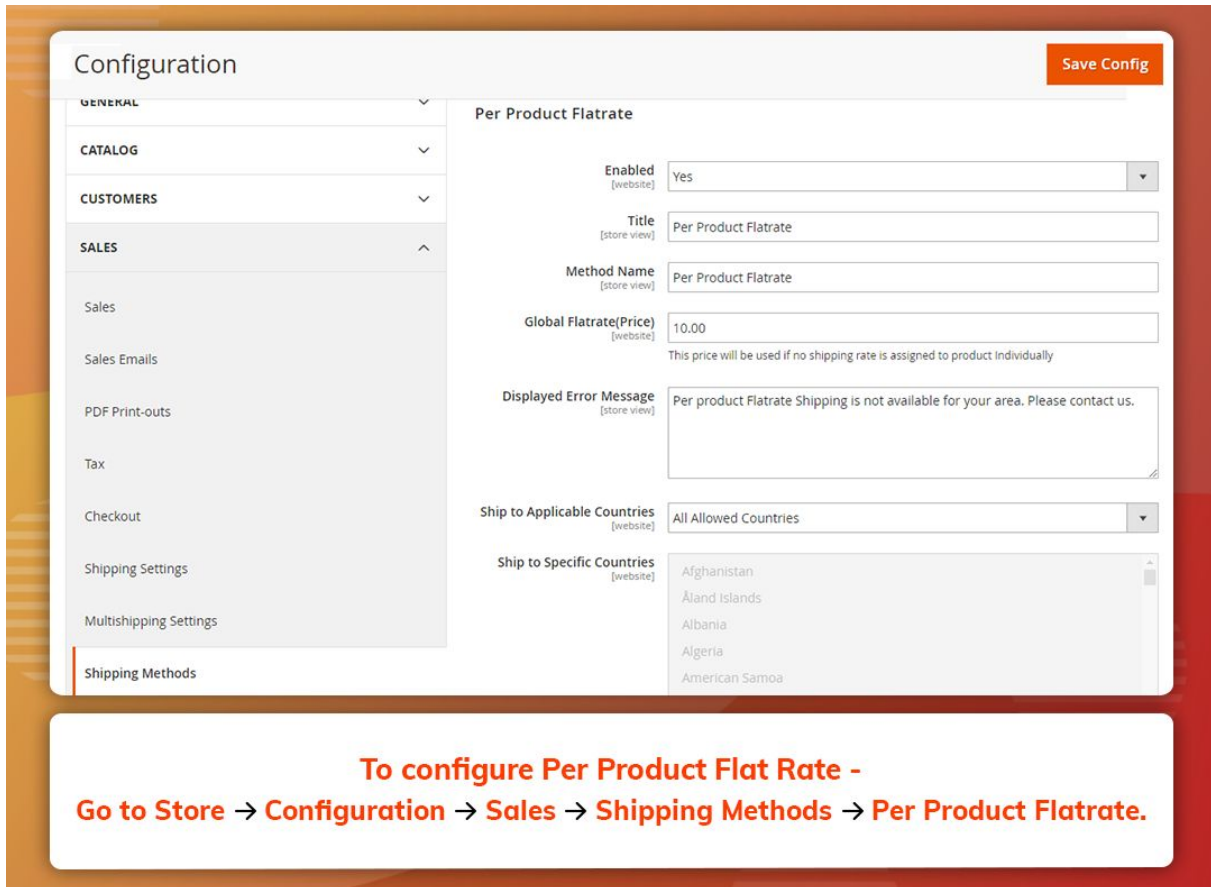

- To complete the installation you need to log out of your Magento Admin and login back.
- Open your SSH or Terminal and run this command 'php bin/magento module:status Zestardtech_Customflatrate' and if you get Output as Module is enabled then our extension is installed properly in your store.

To Note: If you face any error during this process then please either share the screenshots or share credentials of your store at our email id support@zestard.com and will help you install the extension properly.

User Guide

How to Configure Per Product Flat Rate?

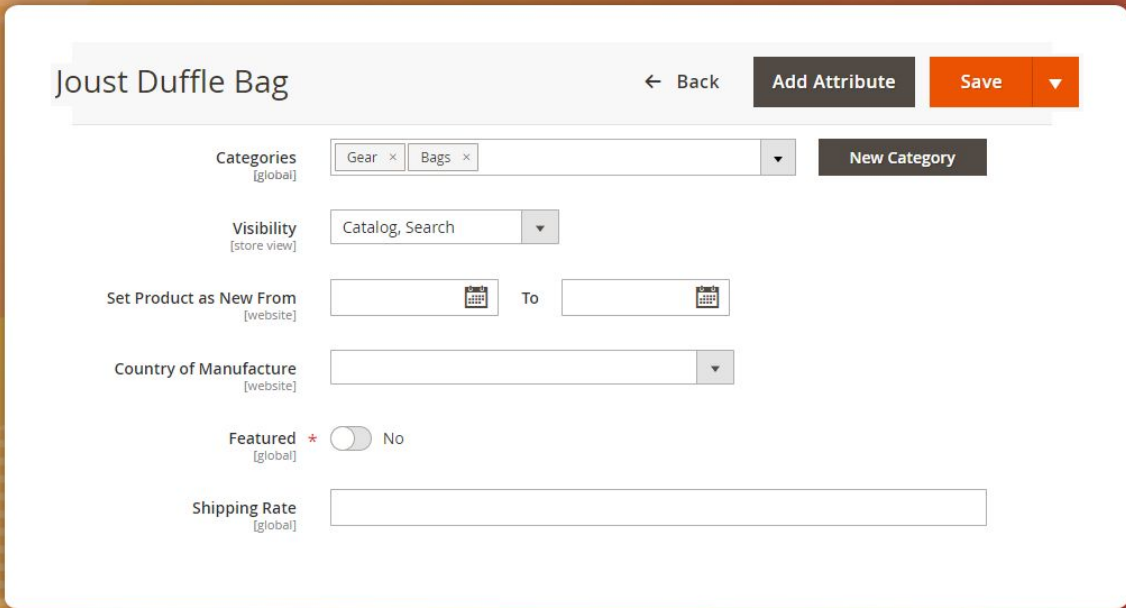

1. Go to Stores → Configurations → Sales → Shipping Method → Per Product Flat Rate.

The screenshot shows a configuration page for 'Per Product Flatrate'. On the left is a sidebar menu with categories: GENERAL, CATALOG, CUSTOMERS, SALES, and Shipping Methods. The 'SALES' category is expanded, showing options like Sales, Sales Emails, PDF Print-outs, Tax, Checkout, Shipping Settings, Multishipping Settings, and Shipping Methods. The main content area is titled 'Per Product Flatrate' and contains several fields: 'Enabled' (set to Yes), 'Title' (Per Product Flatrate), 'Method Name' (Per Product Flatrate), 'Global Flatrate(Price)' (10.00), 'Displayed Error Message' (Per product Flatrate Shipping is not available for your area. Please contact us.), 'Ship to Applicable Countries' (All Allowed Countries), and 'Ship to Specific Countries' (a list including Afghanistan, Åland Islands, Albania, Algeria, and American Samoa). A 'Save Config' button is in the top right corner.

**To configure Per Product Flat Rate -
Go to Store → Configuration → Sales → Shipping Methods → Per Product Flatrate.**

- Admin can set different shipping for each product.

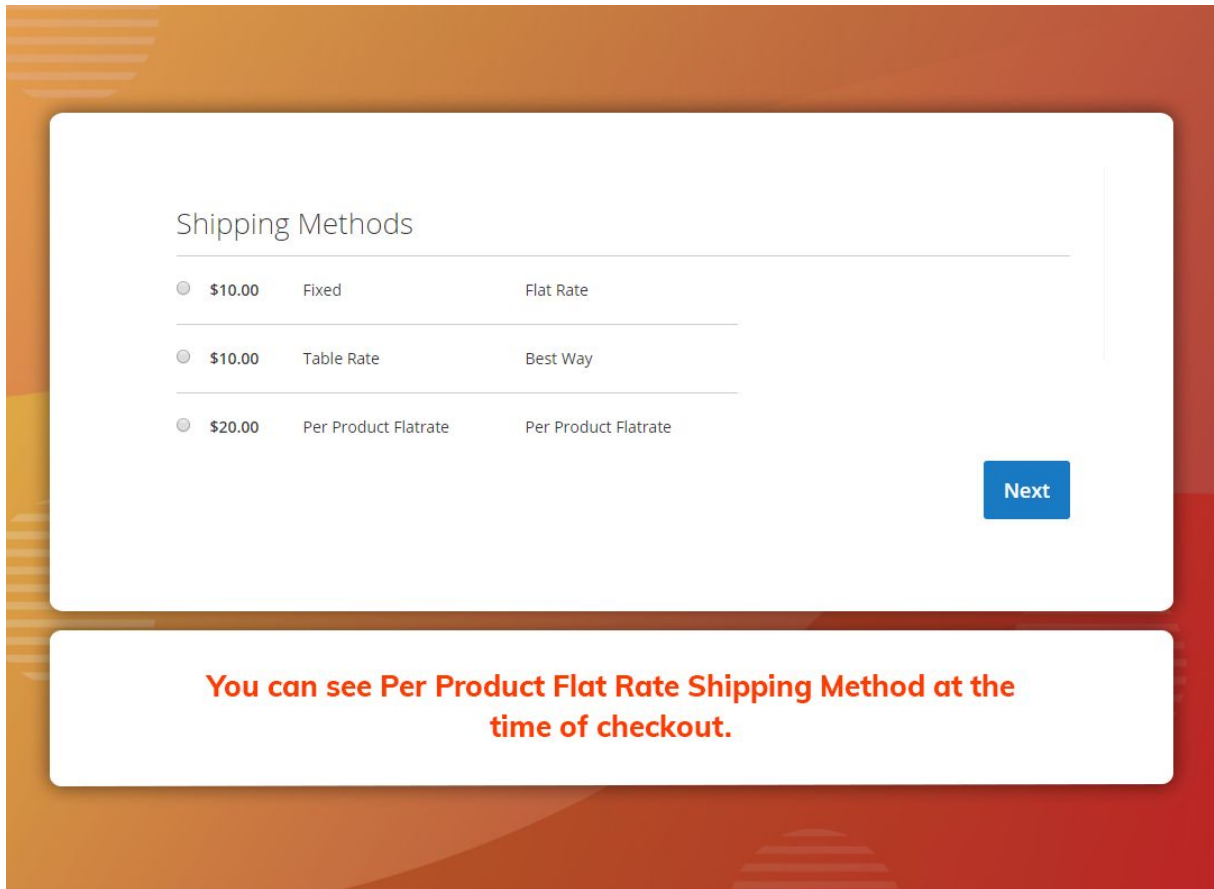

The screenshot displays the product management interface for 'Joust Duffle Bag'. At the top, there is a title 'Joust Duffle Bag' and navigation buttons: 'Back', 'Add Attribute', and 'Save'. Below the title, there are several configuration fields:

- Categories [global]:** A dropdown menu showing 'Gear' and 'Bags' with a 'New Category' button.
- Visibility [store view]:** A dropdown menu set to 'Catalog, Search'.
- Set Product as New From [website]:** Two date pickers with a 'To' label between them.
- Country of Manufacture [website]:** A dropdown menu.
- Featured * [global]:** A toggle switch currently set to 'No'.
- Shipping Rate [global]:** An empty text input field.

Below the form, a white box with a red border contains the text: **Admin can set different shipping prices for each product.**

3. You can see Per Product Flat Rate Shipping Method at the time of checkout.
